Safety First

Stoneco of Michigan is on track to having a world-class safety record. This is possible because of the dedication of our employees. We have recently achieved some of the best safety statistics in the Oldcastle family of companies.

The operations below have worked the following amount of days without a lost time injury:

Zeeb Road: 3,330 days
Ottawa Lake: 1,970 days
Maybee: 1,765 days
Newport: 1,330 days
Denniston: 330 days

Michigan Paving & Materials as a whole has had no lost time injuries, no recordable incidents, and no citations through the first four months of 2008. These are amazing statistics that would not be possible without the dedication to safety that our employees exhibit every day. We are proud that they have taken ownership of the safety program and that everyone is getting home safely every night. Please join us in our efforts to stay safe and recognize safety and safe practices in every aspect of business and life.

Asphalt Materials

We carry a wide variety of splits, micro-surfacing, natural and manufactured sands ideal for use with asphalt at all of four of our limestone quarries and the Zeeb Road sand & gravel operation. Please contact our sales department with any questions you may have on how these products can work for you.

New & Exciting

In the coming weeks and months you may get a phone call or visit from Josh Markgraff. Josh has been working with our sales staff for over a year now in sales and dispatch. Josh is now a permanent part of the sales team and eager to assist you in any way. Please join us in making him feel welcome.

Ottawa Lake - Aglime

Effective Monday June 9th the contractor's price on our Ottawa Lake Aglime material will increase to \$8.05 per ton. The price reflects the increased costs involved in processing this material. This includes everything from blasting, fuel, processing, and loading. This material remains an industry leader in neutralizing value and spread-ability ensuring the most value per ton.

Current Spec and Gradation

Calcium: 20
