Safety First

Seat Belts are Mandatory at all Stoneco Facilities

If you aren't wearing your seat belt, it can't save your life! It doesn't matter if you are driving a pickup truck, a highway haul truck or an off highway truck, dozer, or scraper! It doesn't matter if you are on your way to work, at work, or going on vacation! Collisions, roll overs, over travel of stop blocks and berms, running off the roads or backing off benches are accidents with something important in common! PUT IT ON and BUCKLE UP EVERY TIME you get in the driver's or passenger seat! When you do, you have a real chance of surviving your own or someone else's mistake. Don't leave your spouse without a partner or your child without a parent SEAT BELTS CAN SAVE YOUR LIFE!

Information provided by the Mine Safety and Health Administration.

New & Exciting

We currently mail our location hours and operational updates, as well as this newsletter and any other updates for our operations. We also post these at our locations and website www.stoneco.net as well. If you would like to be added to our email distribution list for this newsletter and any other updates, please email Ryan at rlumpford@stoneco.net. Be sure to include your email and contact information and we will add you to the distribution list.

Chloride Sand

While none of us want to think about the snow, sleet, and freezing rain that comes with winter unfortunately it is just around the corner. It looks to be another harsh winter and in speaking with many of the area suppliers it appears as though there will be another major salt shortage this winter. We are now taking pre-orders on chloride sand from our Zeeb Road location. We expect to have the Chloride Sand available after the first snow of the year and throughout the winter. However if the winter is as harsh as expected and the salt supplies are short we can only guarantee quantities for orders with a signed purchase order. Please contact a Stoneco sales representative to verify quantities and to arrange an order. The material will be priced at \$30.00 per ton for this year.

Placing an Order

Please make sure that all trucks dispatched to our quarries have all the pertinent information. This information should include the following: what material they are hauling, what company is being billed for the material, and a standardized description of where the material is going. The standardized description should be a job name or project number; cross roads should only be used when they are the only applicable description. We have found that when arriving trucks do not have this information it increases wait times and possible billing problems.

Did You Know?

Did you know that the average American will use 820 tons of stone, sand, and gravel in their lifetime? That's an average of around 10 tons per person per year, so the State of Michigan consumes and average of 100 million tons per year.
