Safety First

MSHA Targets Safety

The national Mine Safety and Health Administration unveiled the Safety Targets initiative in an effort to increase awareness of and ultimately eliminate the most common causes of repeat fatal accidents in the 21st Century. The Safety Targets Training Program will be introduced to Stoneco Employees during weekly safety meetings beginning in the spring of 2009. Ten hazard awareness packages will be shared with employees that will cover 75 percent of the fatalities that have occurred in the 21st Century. Stoneco and MSHA believe that if the miners are made aware of what can hurt or kill them, this awareness will serve to prevent them from getting in these dangerous situations. Please contact us at any time with questions regarding this program.

New & Exciting

Chloride Sand is now available at our Zeeb Road Location the material should be available through the remainder of the winter.

Conrad Yelvington of Michigan

Late in 2007, Conrad Yelvington Distributors joined the Oldcastle family of companies with locations in Florida, Mississippi, Alabama, and Michigan. Their extensive knowledge on rail logistics fits nicely into the existing national footprint for Oldcastle. The three Rail/Re-Stock Yards in Michigan are located in Flint, Lansing, and Grand Rapids. All three yards stock MDOT 6AA, MDOT 21AA, MDOT 23A, 1" x 3", OH 4 and many other commercial and landscape materials. We have sent out updated credit applications that cover the CYDI Yards in addition to our existing Stoneco locations. Once we have that information updated, account customers will be able to pick material up at both Stoneco and Conrad Yelvington locations. Mike McIntosh is the point of contact for the Flint & Lansing yards and he can be reached at (810) 577-1911 or by email at MMcintosh@mipmc.com. Please join us in welcoming Mike to the Michigan Group.

Product Spotlight – Misc. Berm

We have another stockpile of Miscellaneous Berm available at our Ottawa Lake Quarry. The material is recycled Yard material and makes an excellent and affordable base for any of your upcoming projects. The material is:

100% Passing the 1 ½" Sieve

92.5% Passing the ¾" Sieve

85.6% Passing the ½" Sieve

39.5 % Passing the #16 Sieve

20.93 % Passing the #200 Sieve

Please contact your salesman on specific applications, quantities, and pricing for this material.
