

# STONECO OF MICHIGAN NEWSLETTER

September 2009

Ottawa Lake, Maybee, Newport, Denniston, Ida,  
Zeeb Road, Ann Arbor, Flint, Lansing

[www.stoneco.net](http://www.stoneco.net)

15203 S. Telegraph Monroe, Mi 48161- Phone: (734) 241-8966 – Fax: (734) 241-3636

## Safety First

### Berming

While visiting any of our locations we ask that you always pay close attention to your surroundings, specifically areas where berms are in place. If you notice an area where a berm has failed please notify us immediately and we will get it repaired. We appreciate your assistance in making our sites safer places to do business.

### Headlights

Trucks visiting our locations please remember to keep your headlights (*not just parking lights*) on at all times, especially in low light and night time conditions. Trucks failing to do so will get a friendly reminder from our onsite staff to keep their lights on.

### Slips, Trips, and Falls

With cold weather here it is the time of year when frost, ice, and snow will begin forming and after years in Michigan we all still require a small adjustment period for these conditions. As the cold months begin please take extra time and precautions to maintain personal safety during these slippery conditions.

### Bulk Salt

We will have bulk salt available to purchase this winter from our CYDI operation in Flint. We have 24 hours service available for the worst of the storms. Please contact Mike McIntosh for information regarding this service and product at (810) 577-1911.

### Remember

We will have Chloride Sand available this year at our Zeeb Road sand and gravel location. Please contact us for specific quantities and additional information regarding this material.

### 21AA @ Maybee

Please contact your Stoneco Salesman prior to starting any sizable projects from the Maybee Quarry using MDOT 21AA and 21AA commercial.

### Convenient Materials

The majority of our locations stock materials that are not produced there; for example we stock Limestone at Sand and Gravel locations and vice versa. We stock 6AA Natural, Peastone, Mason Sand, 1" x 3" Natural, 2NS, Screened Topsoil, Natural Boulders, Fill Sand at our Ottawa Lake, Maybee, and Flint locations. We also stock 1 x 3 Limestone, 21AA Limestone, and 23A Limestone at our Zeeb Road Location. If there is ever a material that we can stock at any of our locations for you that we currently don't please let us know and we will.

### Going Green in Flint

Beginning the first of October we will have MDOT 21AA crushed concrete available at the Conrad Yelvington Flint location. The location is a MDOT pre-certified producer of crushed concrete and is located off of 475 at Carpenter road in Flint. Come in and let our professional staff assist you with all your aggregate needs in the Flint area. This material is 100% recycled and a great way to help meet any "Green" requirements that your project may require. This is just another way that we are doing our part to make the world a better place.
