Safety First

Feeling Fundamental

CRH the parent Company for Oldcastle released the 12 fundamentals for Fatality Elimination. We will periodically review the specifics of a specific principle in this column.

1.) Risk Assessment:

-Each Company must have a documented Risk Assessment Policy in place and it must be communicated to all locations.

-Risk Assessment policies must specifically address non-routine tasks; work carried out by contractors and temporary employees, construction work and off-site delivery procedures.

Take the time to review a task before you start it could include pre shift equipment inspection, a safety briefing, and challenges due to poor light or weather.

Good Luck, Jason

After 5 years of servicing our aggregate customers in the Michigan region Jason Rivard has accepted a position as a "Change Agent" with Oldcastle, our parent company, and will be traveling the country teaching and learning Best Practices. Please join us in wishing Jason the best of luck. Shawn Fetterly will be replacing Jason as our Sales Manager, so congratulations to Shawn as well.

Inside Sales

Tammy Anson will be taking on the responsibilities of our Inside Sales Person. Please feel free to contact her with any questions you may have.
