October 20, 2003

FOR IMMEDIATE RELEASE

Maybee, Mi—Stoneco, a Michigan Paving and Materials company, will donate about 500 tons of aggregate and construction materials to the London/ Maybee/ Raisinville (LMR) Fire Department this fall for enlarging its parking lot and driveways, as well as 12 yards of concrete to the Exeter Township fire department building.

“Safety is high priority at Stoneco,” said Rick Becker, aggregates division manager. “Our concern for safety carries over into everyday life, and into our surrounding communities by helping the LMR Fire Department and others continue their department’s day-to-day job in keeping our families safe.”

Stoneco has donated over \$62,000 in materials throughout the past three years to LMR Fire Department and other surrounding community departments. Stoneco has also provided funding for the departments’ Jaws of Life equipment.

“We are very grateful to Stoneco for its generous contributions of materials throughout the years and to its ongoing donations to keep our firehouse updated,” said Rick Smith, Chief of the LMR Fire Department and Don Sweeney of Exeter Twp. “It remains critical that our department has the most advanced equipment and vicinity to keep us at the forefront of rescue capability.”

“LMR Fire, Exeter, Whiteford and the other departments do an outstanding job for people throughout our communities,” said Becker. “By providing our emergency service departments with materials needed to continue its great service, we demonstrate our appreciation for the excellent work and heroism of the men and women in the department.”

Stoneco has also been a staunch supporter of surrounding communities by donating money and equipment to many charitable organizations, school programs, churches and service departments. The company also stands out as a good neighbor providing personal assistance to many families and businesses in need of smaller repairs and cleanup of driveways and homes.

*Stoneco is an Oldcastle Company.*
